PROFILE

Detail-oriented **Data Analyst** and **Data Scientist** with expertise in **Excel, SQL, Python, Statistics, Tableau** and **Power BI**. Skilled in **Data Cleaning, Exploratory Data Analysis (EDA)**, Dashboard Development, and generating Actionable **Business Insights**. Experienced in Data Science workflows including **Data Preprocessing** and basic **Machine Learning** techniques such as **regression, classification, and clustering**. Passionate about **Data Transformation** and enabling Data-Driven **Decision-Making**. Strong **Problem-Solving** and **Analytical Thinking** abilities with good **communication skills**.

SKILLS

- **Programming Languages :** Python (Pandas, NumPy, Seaborn, Matplotlib, Sci-kit Learn), SQL
- **Data Analysis Tools:** Excel (LOOKUP functions, INDEX-MATCH, Macros, IF/Nested IF), **Power BI** (DAX, Power Query, Data Modeling), **Tableau** (Dashboards, Storytelling, Data Blending)
- **Machine Learning :** Linear Regression, Logistic Regression, Decision Trees, K-Means Clustering, Model Evaluation, Basic understanding of supervised and unsupervised learning
- **Database:** MySQL
- **Core Concepts:** Data Cleaning, ETL, EDA, Data Visualization, Statistics
- **Other Skills:** Data validation, Pivot tables, Power Query, DAX

SOFT SKILLS

Leadership Problem Solving Team Collaboration Communication Skill Analytical Thinking

PROFESSIONAL TRAINING

Data Science & Analytics Training : FortuneCloud Technology Pvt Ltd, Pune 07/2025 – 05/2026

Worked on real-world datasets for data cleaning and analysis. Performed predictive analysis using Excel, SQL, Python, and statistics. Developed business dashboards in Power BI and Tableau.

PROJECTS

- 1. BeanScope: Sales Analysis Dashboard (Excel Project)** [Git-Link](#)
Tools Used: Excel (Pivot Tables, Charts, Slicers)
 - Analyzed sales data to identify **revenue trends** and **top-performing products**.
 - Built interactive dashboard using **Pivot Tables, Charts, and Slicers**.
 - Performed **data cleaning** and **transformation** for accurate reporting.
 - Identified peak sales periods and best-selling categories to improve sales strategy.
- 2. DisasterScope: Global Analysis Dashboard (Power BI Project)** [Git-Link](#)
Tools Used: Power BI, DAX, Power Query
 - **Cleaned** and **transformed** global disaster dataset using **Power Query**.
 - Created **DAX measures** to calculate total incidents, **affected population**, and trends.
 - Designed interactive dashboards with **filters** and **slicers** for better analysis.
 - Identified high-risk regions and disaster frequency trends to support response planning.
- 3. Customer Service Request Analysis (NYC 311 Dataset) (Python Project)** [Git-Link](#)
Tools Used: Python, Pandas, Numpy, Matplotlib, Seaborn, Jupyter Notebook
 - Performed **data cleaning and preprocessing** by handling missing values and removing invalid record.
 - Created **Request Closing Time** feature to analyze service efficiency.
 - Conducted **EDA** to identify top complaint types and city-wise distribution.
 - Built **visualizations and applied statistical testing** to analyze response time patterns.

EDUCATION

BSc in Computer Science -- Shivaji University Kolhapur.	08/2022 – 04/2025
Percentage : 69.58% (CGPA : 8.19)	Kolhapur
HSC--Raosahebaana Kitturkar Junior College, Gadhinglaj.	06/2020 – 03/2022
Percentage : 65.67%	Kolhapur
SCC -- Jagruti Highschool, Gadhinglaj.	06/2019 – 03/2020
Percentage : 81.20%	Kolhapur

CERTIFICATIONS

Data Science with data analytics Course at FortuneCloud Technology, Pune 07/2025 – 05/2026 (In progress)
