PROFILE:

Aspiring Data Analyst with expertise in Excel, SQL, Power BI/Tableau, Statistics and Python skilled at transforming raw data into actionable insights. data cleaning, data modeling, and dashboard development with hands-on experience in ETL pipelines, reporting automation, and statistical analysis. Proficient in uncovering trends, optimizing decision-making, and delivering business intelligence solutions through interactive dashboards. Passionate about leveraging data to drive growth, efficiency, and performance.

TECHNICAL SKILLS

- **Programming & Tools:** R (Basic), Python (Pandas, NumPy, Seaborn, Matplotlib), SQL
- **Data Visualization & BI:** Excel (VLOOKUP/XLOOKUP, Pivot Table, Charts), Power BI (DAX, Power Query, Drill-through, Row-level security), Tableau (Dashboards, Storytelling, Extracts, Data Blending)
- **Databases:** MySQL
- **Data Analytics & Statistics:** Data Cleaning, Data Modeling, Hypothesis Testing, Regression Analysis, Correlation, Descriptive Statistics
- **Other Skills:** ETL (Extract, Transform, Load), KPI Tracking, Reporting Automation, Business Intelligence

SOFT SKILLS :

Adaptability Team building Problem Solving Amicable

PROFESSIONAL TRAINING:

Completed Data Analytics Course from Fortune Cloud Technology Pvt. Ltd July/2025 - Jan/2026 Pune

- Cleaned, transformed and analyzed datasets using Excel, SQL and Power BI/Tableau.
- Generated reports and summaries for decision-making, built tables, charts and basic dashboards for data visualization.
- Applied statistical and analytical methods to identify trends and insights.

PROJECTS

1) Coffee Shop Sales Analysis.

- Cleaning and analyzed coffee shop sales data to identify peak hours, top-selling products, and monthly trends.
- Used Excel for data cleaning, aggregation, and visualization.
- Created interactive dashboards to highlight actionable insights.

2) Global Disaster Response Analysis.

- Analyzed global disaster response data to identify patterns in impact, response time, and resource allocation.
- Collected, cleaned, and processed datasets to generate meaningful insights and trends.
- Presented findings using visual summaries to support data-driven decision-making.

3) Exploratory Analysis of Global Earthquake-Tsunami Events.

- Conducted exploratory data analysis on global earthquake data (2001–2022) using Python.
- Analyzed magnitude, depth, and location to identify patterns related to tsunami events.
- Created visualizations using Pandas, NumPy, Matplotlib, and Seaborn to generate insights.

EDUCATION

BSc in Statistics (Shivaji University Kolhapur)	07/2022 – 06/2025
Score : 85.40% (CGPA: 8.54)	Kolhapur
HSC – G G V P Junior college Halkarni	06/2021-06/2022
Score : 56.17%	Kolhapur
SSC – Sharadabai High School Nittur	06/2019 – 03/2020
Score : 81.40%	Kolhapur
